

BEANFIELD TRADER TURRET

# One device, effortless communication

## Overview

Beanfield provides traders with a purpose-built, mobile trading turret and smart phone in one device. The Beanfield Trader Turret combines the functionality of traditional turret systems, the ease of use of desktop phones, and the latest touch screen technologies into one streamlined, cost-effective package.

Work from anywhere with full mobility and connect from anywhere over the internet. With the Beanfield Trader Turret's unique size and design, it is the only turret that you can fold, take on the road and plug & play over the internet. The entire system measures at 9" h x 6" w and weighs less than 5lbs.

The Command Module configuration offers 1 or 2 handsets, a speaker, 16 speaker channels, and 96 programmable physical/touch-screen keys for private lines, broker lines, speed dials, conferencing and intercom. Platform features include barge-in, overflow call coverage, call history per line and regulator-compliant call recording.

These features can be extended across 1 or 2 additional Key Modules for a total of 960 programmable touch-screen and hard-key functions.

## Key Features

Support for Hoot-n-Holler, TV/Radio audio, ARDs, MRDs, and more with no dedicated hardware.

Choose how to interact with your keys with tactile hard keys, touch screen soft keys, or both.

Customizable with up to two additional key modules, two handsets, and up to 16 programmable speakers.

Organize and see more contacts, lines, features, or speed dials all on a single page.

Work from anywhere - simple, portable, plug-and-play operation.

Beanfield is a telecommunications company unlike the rest. We recognize the importance of connecting communities and the people within them, and we do this without sacrificing outstanding customer support and superior services. At Beanfield, it's about building communities, not just networks.

Founded in 1988, Beanfield builds, owns and operates the largest independent fibre-optic network in Toronto, Montreal and Vancouver. We connect over 3300 commercial and residential buildings. All of our construction, installation, and customer experience teams are in-house, giving you the most efficient and streamlined experience possible, because we believe that's **How it should be.**
