

Beanfield Soft Turret Client

Work from anywhere with just an internet connection

Overview

Beanfield allows traders to move your trading turret to your PC. The Soft Turret mirrors the desktop device on a PC or laptop and nothing needs to be installed as it uses WebRTC available through a web browser.

Use the same user profile as your physical device, requiring little to no training to utilize your Soft Turret profile. Users will interact with a digital Command and/or Key module that maintains the user's physical device configurations, keys, and feature layouts. Bluetooth or USB headsets are supported as well as the PC internal or external speakers and microphones.

The Soft Turret can support touch screen functionality for touch-enabled monitors, and traditional inputs such as mouse and keyboard shortcuts.

New or current users can have the Soft Turret as a stand-alone solution, with over 500 programmable keys and 16 speaker channels the Soft Turret can support office and trading, command and control, and emergency services communications requirements in one integrated system.

Key Features

Easy to use – no hardware or software to install

Internal/External speaker compatibility and split audio for listening functionality

Call and speaker recording, call twinning, and more

Multiple lines on a single key with over 500 programmable keys

Supports 16 Speaker Channels

Supports PSTN, ARD, and MRD

WebRTC enabled through browser with bluetooth and USB headset support

Beanfield is a telecommunications company unlike the rest. We recognize the importance of connecting communities and the people within them, and we do this without sacrificing outstanding customer support and superior services.

At Beanfield, it's about building communities, not just networks.

Founded in 1988, Beanfield builds, owns and operates the largest independent fibre-optic network in Toronto and Montreal. We connect over 3000 commercial and residential buildings. All of our construction, installation, and customer experience teams are in-house, giving you the most efficient and streamlined experience possible, because we believe that's **How it Should Be.**
